INTRODUCTION AND OVERVIEW

This year marks the 60th anniversary of the *Statistics of Communications Common Carriers* (SOCC). This publication, the first issue of which covered the year 1939, was initially known as the *Statistics of the Communications Industry in the United States.* The book, prepared by the Commission's Accounting, Statistical, and Tariff Department, originally contained a section on broadcast financial data. That section was dropped in 1950 and the publication was renamed in 1957. Prior to 1939, some of the common carrier statistics were included in the Commission's Annual Reports to Congress and some were released in mimeographed form.

The 1939 publication (printed in 1941 and sold for 25 cents) contained information that had been filed by 91 telephone companies. These carriers, which accounted for about 97 percent of the total operating revenues of all U.S. telephone systems, reported $347 million of toll service revenue and total operating revenues of $1.2 billion. About 18 million telephones were in use at year-end, and the percentage of households with telephone service (based on census figures, as utilized by AT&T) stood at 36%. Telegraph companies reported about $140 million in operating revenues.

The *Statistics of Communications Common Carriers* is the only permanent record of common carrier activity published by the U.S. Government Printing Office and sent to Federal depository libraries throughout the United States. This publication can be purchased by mail from the Superintendent of Documents, Washington, DC 20202-9328, or by calling GPO's Order and Inquiry Desk at (202) 512-1800.

TIMING OF THE PUBLICATION

Most companies report information for the prior calendar year to stockholders and to the Securities and Exchange Commission by April 1. At that same time, they provide annual reports on their domestic operations to the FCC. The information is made available to the public as soon as it is received. A summary of the domestic data is released by the FCC around May 31. This occurs after the data has been checked, inquiries on suspect items sent to the carriers, corrected submissions received, and the industry tables compiled.

Unlike data for domestic operations, corrected data for international services are typically not received until at least ten months after the end of the year being reported. Summaries of the international data are typically prepared and released in November and, in prior years, the SOCC was not set for publication until after that information was available. As a result, prior editions of the SOCC were delayed because of the additional time needed to receive and process the international data.

This year, we have shortened the production cycle in order to reduce the delay in publication. This has been done by lagging the publication of international data by one year. Thus, this edition of the SOCC contains the international statistics *only through 1998*. International data for 1999 will be available at the usual time through the Internet, from duplicating contractors, and in the FCC's public reference center, but it will not be published in the SOCC until next year. Other changes in the present edition include the elimination of a number of tables and the relocation of others, which made it possible to reduce the number of parts (sections) from eight to five. There are also style changes, most notably the abandonment of the all "caps" format.

SOURCES OF INFORMATION PRIOR TO THE PUBLICATION OF THE SOCC

Much of the material contained in this volume is available before the SOCC is published by the Government Printing Office. The information in this section is designed to help locate data prior to the publication of the next edition.

INTERNET

The Common Carrier Bureau has a home page on the World Wide Web. This home page can be accessed directly at http://www.fcc.gov/ccb or through a link from the main FCC home page at http://www.fcc.gov. The materials available include orders, notices of proposed rulemaking, statistical reports, public notices, news releases, fact sheets, and answers to frequently asked questions (FAQs). Prior to the development of the Internet, an electronic bulletin board called **FCC-State Link** had been established to share data electronically with state agencies, and a portion of the FCC's Internet site still bears that original name. A large amount of statistical information is available in the **FCC-State Link.** It includes all of the files contained in the SOCC and a variety of other reports that are used in the preparation of the SOCC. The **FCC-State Link** can be reached directly at http://www.fcc/gov/ccb/stats. The annual carrier submissions that are used in developing many of the tables in this publication can also be found at http://www.fcc/gov/armis/db.

DUPLICATING CONTRACTORS AND REFERENCE INFORMATION CENTER

Several private firms specialize in locating, duplicating, and distributing FCC documents. The Commission's current duplicating contractor is International Transcription Service, Inc. (ITS). Documents can be purchased by calling ITS at (202) 857-3800. Reports and the summaries used in the preparation of the SOCC are also available in the FCC's Reference Information Center. This facility is located on the Courtyard Level, 445 12th Street, S.W., Washington, D.C. The center contains self-service, card- or coin-operated copying machines for use by the general public.

COVERAGE

LOCAL TELEPHONE COMPANIES

There are approximately 1,300 companies that provide local telephone service in the United States. These companies, often referred to as incumbent local exchange carriers (ILECs), range in size from rural cooperatives serving fewer than 100 customers to large holding companies serving millions of telephone lines. In most cases, only larger companies (those with more than $114 million in annual revenues in 1999) are required to file information with the FCC and only telephone companies affiliated with the five largest holding companies are required to file the most extensive information. New telephone service providers, referred to as competitive local exchange carriers (CLECs), and providers of wireless telephone service are not required to file detailed statistical data with the Commission.

In 1999, as shown in the detailed statistics in Tables 2.10 and 2.11, there were 52 reporting ILECs. While these companies account for more than 90% of the nation's local telephone service, they do not reflect a complete census of the industry. Furthermore, there are variations from state to state in the proportion of the industry

reported. Information is available on the number of telephone lines (in industry language, "loops") served by each telephone company whether the company is a reporting carrier or not. Within each state, the proportion of loops served by reporting companies (shown in Table 5.1) is sometimes used to inflate the figures included in other tables to estimate state totals.

LONG DISTANCE COMPANIES

More than 700 firms buy access from local telephone companies in order to provide long distance service and a limited amount of data on the larger long distance companies is contained in various tables throughout the SOCC. Among long distance carriers, only AT&T and Alascom, which were regarded as dominant carriers possessing market power, were ever required to file detailed reports. This data is contained in earlier editions of this publication. The reporting requirements, however, were eliminated when the FCC determined that AT&T was no longer a dominant carrier.

ACCOUNTING STANDARDS

A new Uniform System of Accounts (USOA) for the telephone industry became effective at the beginning of 1988. The detailed tables in this report are based on that system. This year, however, the tables reflect a number of changes in the Commission's accounting rules that were adopted in 1999. The most significant of these is the streamlining of the accounting requirements for certain mid-sized ILECs. The streamlining is based on the aggregate revenue of a company and all its affiliates. Full Class A reporting requirements are imposed only where the aggregate revenues of an ILEC and its affiliates exceed $7 billion. In 1999, only Bell Atlantic, BellSouth, GTE, SBC, and U S WEST remained subject to full Class A reporting requirements. The results for the 30 carriers affiliated with these firms appear in table 2.10. The amount of state-by-state information varies from company to company. Ameritech has historically maintained a separate operating company in each state and consequently files information for each state. In contrast, U S WEST has consolidated its operations into a single company servicing 14 states and it files aggregated information.

Where the revenues of all affiliated ILECs total less than $7 billion, each of the affiliated ILECs earning revenues over the reporting threshold is eligible for Class B (streamlined) reporting treatment. Results for the mid-sized companies are shown in Table 2.11. The total number of reporting companies --52-- is unchanged from 1998.

The USOA applies to telephone operating companies. It is not designed to capture the activities of parent holding companies or subsidiaries. Where activities have been transferred from telephone companies to holding companies or subsidiaries, the revenues from those activities cease to be reported by the operating companies. For this reason, along with several other differences between financial and regulatory accounting systems, the results contained in reports to the FCC may differ markedly from reports to the SEC.

INDUSTRY ANALYSIS AND MONITORING DATA

The data contained in Parts 1 through 4 primarily concern the rates, investments, revenues, expenses and earnings of regulated carriers -- data essential to economic regulation. Tables of historical data drawn from previous editions of the SOCC, along with selected data on the U.S. economy, are also contained in Part 4.

In addition to the bare essentials needed for economic regulation, a variety of other information is necessary to understand and analyze the conduct of firms and the economic performance of the industry. The tables in Part 5 summarize some of this information, much of which comes from two sources:

- In 1984, the FCC established the Industry Analysis Division to provide an increased understanding of the telecommunications industry.

- In 1987, a joint board of FCC commissioners and state regulatory commissioners established a program to monitor the effects of numerous policy changes. Nineteen reports to Congress were released over the next ten years. In 1997, a second joint board established an expanded program to examine the progress of universal service programs and includes information on industry revenues and costs, low-income support, high-cost support, schools and libraries, and support for telecommunications to rural health care providers. The periodic monitoring reports provide information on costs and usage for all incumbent local telephone companies, including those small companies that do not normally report to the FCC.

OTHER INFORMATION SOURCES

An annual report prepared by the Rural Utilities Service (formerly the Rural Electrification Administration) provides detailed information on each of the several hundred smaller telephone companies that have received loans or loan guarantees from that agency. The annual *Statistical Report of Rural Telephone Borrowers* is published by, and available from, the U.S. Government Printing Office.

The United States Telephone Association represents most local telephone companies. Like many trade associations, it collects information from each of its members. Annually, it prepares, publishes and sells statistical publications such as *Phone Facts* and *Statistics of the Local Exchange Carriers*.

* * * * * * * * * * * *

This volume of the *Statistics of Communications Common Carriers* was prepared by John Adesalu, Linda Blake, Mike Lehner, and Katie Rangos under the supervision and direction of Alan Feldman. Many of the tables appearing in Part 5 are based on the statistical work of other members of the staff of the Industry Analysis Division, especially Alex Belinfante and Jim Lande. All have worked long and hard to expand and improve the publication.

We invite comments and suggestions for further improvements. For your convenience, the survey form on the following page may be used for your response.

Source: Company annual reports to shareholders and annual reports Form 10-K.

1/ Operating revenues and costs for AT&T include $14.686 billion in access and other interconnection charges.
2/ Includes extraordinary items.
3/ Excludes equity losses of $2.022 billion from Liberty Media Group. Average shares and per-share data are for AT&T Group.
4/ Pro forma results for Global Crossing, based on the assumption that its acquisition of Frontier Corp. occurred on Jan. 1, include revenues of $4.140 billion and costs & expenses of $4.355 billion.
5/ Excludes lines outside the United States. Global access lines totaled about 35.3 million.
6/ Excludes special access lines.
7/ The per-share and average shares data are for Sprint's FON Group based on net income of $1.574 billion. The PCS Group suffered a loss of $2.73 per share, base on a net loss of $2.517 billion and 920 million shares outstanding.

Note -- Carriers controlled by other companies are indicated by indentations from the margin. In a few cases, an intermediate of control has been omitted. The information shown is principally from annual reports filed with the Commission.

1/ Company is basically a competitive local exchange carrier, but it reports to the FCC because of its long distance operations. Its total operating revenues for 1999 amounted to $1.551 billion.

2/ The division consists principally of Sprint Communications Company L.P.

3/ Company is engaged primarily in non-common carrier activities, but is required to report to the FCC because of its long distance operations. It reported total operating revenues of $2.023 billion.

Table 1.3 - Changes Affecting Coverage of Table 1.2

No.	Name of Company	Type of Company	Remarks
	Additions:		
1	ALLTEL Communications, Inc.	Interexchange	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
2	Broadwing Telecommunications Inc.	"	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
3	Facilicom International, L.L.C.	"	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
4	Global Crossing Ltd.	Holding	Parent company of Frontier Corp. and two reporting subsidiaries that were formerly controlled by Frontier (see below).
5	IDT Corporation	Interexchange	>
6	McLeodUSA Telecommunications Services, Inc.	"	>
7	Network Plus, Inc.	"	> These six companies became subject to the Commission's reporting requirements at
8	New Global Telecom, Inc.	"	> 47 CFR 43.21(c).
9	NOSVA Limited Partnership	"	>
10	Startec Global Operating Company	"	>
11	Teleport Communication Group Inc.	Interexchange	Basically a CLEC, acquired by AT&T Corp. in July 1998, but reporting to the Commission as an IXC. (See ACC, below.)
12	Viatel, Inc.	"	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
13	Viatel Services, Inc.	"	Carrier became subject to the Commission's reporting requirements at 47 CFR 43.21(c).
	Deletions:		
1	Aliant Communications, Inc.	Holding	Deleted following the merger of its operating subsidiary with and into ALLTEL Corp.
2	ACC Long Distance Corp.	Interexchange	The carrier's parent company, Teleport Communications Group, now includes ACC's revenues in its own reported amount.
3	Puerto Rico Telephone Authority	Holding	Deleted after GTE purchased from the Authority a controlling interest in the parent company of the Puerto Rico Teleph. Co.
4	Telegroup, Inc.	Interexchange	Carrier filed for bankruptcy in Feb. 1999; its global retail business was acquired by Primus Telecommunications in June 1999.
5	Westinghouse Communications	"	Carrier's financial data are included in data reported by parent company, RSL COM U.S.A., Inc.
	Mergers and Name Changes:		
1	Cincinnati Bell, Inc./IXC Communications, Inc.	Holding	These companies merged in November 1999, and Cincinnati Bell began doing business as Broadwing Inc.
2	Global Crossing Ltd./Frontier Corp.	Holding	Global Crossing acquired Frontier, effective Sept. 28, 1999.
3	GTE Corporation/Telecomunicaciones de Puerto Rico, Inc. (TELPRI)	Holding	GTE acquired a controlling equity interest in TELPRI, parent of the Puerto Rico Telephone Co., effective Mar. 2, 1999.
4	SBC Communications Inc./Ameritech Corp.	Holding	These companies merged effective Oct. 8, 1999, with Ameritech becoming a wholly owned subsidiary of SBC.
5	Star Telecommunications, Inc./PT-1Communications, Inc.	Interexchange	Star Telecomm. acquired PT-1 Comm., effective Feb. 4, 1999.
6	Broadwing Communications Inc.	Holding	Changed from IXC Communications, Inc. following company's merger with Cincinnati Bell.
7	Broadwing Communications Services Inc.	Interexchange	Changed from IXC Communications Services, Inc. after carrier's parent was acquired by Cincinnati Bell.
8	Global Crossing Telecommunications Services, Inc.	"	Changed from Allnet Comm. Svcs, Inc. d/b/a Frontier Comm. Svcs. when Frontier Corp. merged with Global Crossing Ltd.
9	Global Crossing Bandwidth, Inc.	"	Changed from Frontier Communications of the West, Inc. when Frontier Corp. merged with Global Crossing Ltd.
10	Talk.com Holding Corp.	"	Changed from Tel-Save, Inc.
11	Teleglobe Business Solutions Inc.	"	Changed from Telco Holdings, Inc.

1999	37.1	21.6		9.0	23.0	5.7	3.5

Notes for Tables 1.4 - 1.6

1/ ACC Long Distance Corp. and Teleport Communications Group merged in April of 1998, and the combined company, Teleport Communications Group merged with AT&T Communications, Inc., in July of that year. AT&T Communications acquired Alascom, Inc., August 7, 1995 and began filing a consolidated revenue statement in 1996.

2/ MCI WorldCom's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999.

3/ WorldCom, Inc. completed a merger with MCI Communications Corp. in September of 1998 and filed 1998 revenue figures for the combined company, MCI WorldCom, Inc. MCI Communications Corp. and Telecom*USA merged during 1989 and began reporting consolidated revenues in 1990. Metromedia Communications Corp. and ITT Communications Services, Inc., merged during 1988, but reported 1989 revenue separately. LDDS Communications, Inc., and Advanced Telecommunications Corp. merged in 1992. In 1993, LDDS merged with Metromedia Communications Corp. and Comsystems Network Services. For 1993, only the revenues that were received after the merger are included in LDDS's revenues; those preceding the merger are listed individually. LDDS and Wiltel merged January 5, 1995. In May 1995, LDDS changed its name to WorldCom, Inc. WorldCom acquired MFS Intelenet December 31, 1996.

4/ Sprint's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999.

5/ In July 1986, GTE Sprint and US Telecom merged into US Sprint. The information shown for GTE Sprint and US Telecom for 1986 is for January 1 - June 30. The information shown for Sprint Communications Corp. (then US Sprint) for 1986 is for July 1 - December 31. United Telecommunications, Inc., then majority owner of US Sprint, purchased the remaining interest from GTE in July of 1992. Effective February 16, 1992, the company's name became Sprint Communications Co.

6/ LCI International Telecom Corp. and USLD Communications, Inc., merged in December of 1997 and filed separate revenue statements for the year. Qwest Communications Corp. merged with LCI and USLD Communications, Inc., in June of 1998, and each of the three affiliated companies filed a separate revenue statement for 1998.

7/ Teleglobe Business Solutions was formerly known as Telco Holdings, Inc. Teleglobe USA, Inc., merged with Excel Telecommunications, Inc., and its affiliate in November of 1998. Excel Telecommunications, acquired Telco Holdings, in October of 1997.

8/ Global Crossing Ltd. acquired Frontier Corporation September 28, 1999. In 1994, RCI Long Distance, Inc., changed its name to Frontier Corporation.

9/ Star Telecommunications' s revenues for 1996 - 1998 have been prorated to reflect the decrease in in revised revenues reported for 1999.

10/ Cincinnati Bell Inc., merged with IXC Communications, Inc., on November 9, 1999 and soon began doing business as Broadwing, Inc.

11/ RSL COM USA bought Westinghouse Communications in August 1998.

12/ Data for 1996 taken from the Annual Report to the Colorado Public Utilities Commission from telecommunications carriers regulated pursuant to §40-15-301 C.R.S.

13/ Primus Telecommunications, Inc. acquired TresCom International, Inc., in 1998.

14/ For 1999, revenues exclude $61 million from cable television operations.

15/ Estimated by FCC staff.

Part 2

Telephone Carriers

NOS Communications, Inc. 1/	Las Vegas, NV	122,209	0

* In some cases, the headquarters listed is for the parent company. See Table 1.2 for the intercorporate relations of communications carriers and controlling companies.

\# Includes plant under construction. Figures may also include plant used in providing communications services other than long distance (e.g., Teleport Communications Group and Williams Communications). See also footnotes to Table 1.2.

1/ Company is basically a reseller; therefore, it reported no communications plant.
2/ Company is a subsidiary of Teleglobe Inc.
3/ Plant included in amount reported by Viatel, Inc.
4/ Company is a subsidiary of AT&T Corp.
5/ Plant figure is for the consolidated RSL COM U.S.A. entity, including that of RSL COM Primecall.
6/ Company is a subsidiary of Qwest Communications International, Inc.
7/ Revenues exclude $33.6 million from non-communications operations; plant excludes $42.4 million.

Notes for Tables 2.2 through 2.5

Data for Tables 2.2 through 2.5 were obtained from annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting local exchange carriers.

See Table 2.6 for data of individual carriers. Zero entries, as distinguished from blank spaces, denote there is no information to report. Totals by state may be understated because of the incomplete data.

Detail may not match totals because of necessary rounding.

Outside Plant Statistics

Unless otherwise stated, data include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or metallic conductors is classified as fiber.

Kilometers equals total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.

Equivalent number of poles is the number of solely owned poles plus the sum of the products of the numbers of those jointly owned times their ownership percentages.

Notes for Tables 2.2 through 2.5 -- Continued

Access Lines

Access lines include WATS and WATS-like access lines, 800 and 800-like access lines, and employee concession lines, but not official/company circuits. Analog access lines are shown in 4Khz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines.

Digital access lines are shown in 64 Kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.

Other switched access lines exclude digital centrex extensions, which were included prior to 1991. Switched access lines exclude ISDN control channels, which were included as 64 Kbps equivalents prior to 1991. Switched access lines also exclude WATS and WATS-like access lines, which were included as switched access lines prior to 1997. WATS and WATS-like access lines are classified as special access lines.

Figures for switched access lines reported in the ARMIS 43-08 Report for some companies are slightly different from figures for billable access lines reported in the ARMIS annual summary report (FCC Report 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS 43-01. Some companies may have included official/company circuits with ARMIS 43-08 access lines.

The Ameritech operating companies, now part of SBC, did not report digital PBX & Centrx trunks or Centrex extensions.

The GTE operating companies, except for Puerto Rico Telephone Company which reported only digital PBX & Centrex trunks, did not report digital PBX & Centrex trunks or Centrex extensions.

The Sprint operating companies did not report digital Centrex extensions.

BellSouth Telecommunications, Inc. excluded feature Group A, out-WATS, 800 service, and two-way WATS from access lines. The company reported only CPE and semi-public access lines as public access lines. The company was unable to provide digital PBX & Centrex Trunks by technology, reporting analog and digital PBX & Centrex trunks in the analog category.

Telephone Calls and Minutes

The number of toll calls is based on originating message volumes and includes outward calls, 800 service, directory service, dial-it services (e.g., 900 and 936 services), and optional calling plans. IntraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes-of-use, including call set-up time, holding time and conversation time.

STATISTICS OF COMMUNICATIONS COMMON CARRIERS

Table 2.6 - Operating Statistics of Reporting Local Exchange Carriers as of December 31, 1999

Items	1 All Reporting Local Exchange Companies *	2 Regional Bell Operating Companies *	3 GTE Reporting Local Exchange Companies *	4 All Reporting Mid-Sized Local Exchange Companies *

Source: Annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting local exchange carriers.

Note – Certain data pertaining to the carriers included in this table are unavailable. Where such is the case, the space provided for the information has been left blank, as distinguished from insertion of zero, which means that none was reported.

– Detail may not match totals because of necessary roundings.

– Unless otherwise stated, outside plant statistics include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.

– Kilometers equals total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.

– Equivalent number of poles is the number of solely owned poles plus the sum of the products of the numbers of jointly owned times their ownership percentages.

– Access lines include WATS and WATS-like access lines, and 800 and 800-like access lines, and employee concession lines, but not official/company circuits. Analog access lines are shown in 4Khz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines. Digital access lines are shown in 64 kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.

– Other switched access lines exclude digital Centrex extensions, which were included prior to 1991. Switched access lines exclude ISDN control channels, which were included as 64 Kbps equivalents prior to 1991. Switched access lines also exclude WATS and WATS-like access lines, which were included as switched access lines prior to 1997. WATS and WATS-like access lines are classified as special access lines.

– Figures for switched access lines reported in the ARMIS 43-08 Report for some companies are slightly different from figures for billable access lines reported in the ARMIS annual summary report (FCC Report 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS 43-01. Some companies may have included official/company circuits with the ARMIS 43-08 access lines.

– The number of toll calls is based on originating message volumes and includes outward calls, 800 service, directory service, dial-it services (e.g., 900 and 936 services), and optional calling plans. Intralata toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes of use, including call set-up time, holding time, and conversation time.

* See footnotes below regarding data of individual carriers.

1/ BellSouth Telecommunications, Inc. excluded feature Group A, out-WATS, 800 service, and two-way WATS from access lines. The company reported only CPE and semi-public access lines as payphone lines. The company was unable to provide digital PBX & Centrex trunks by technology, reporting analog and digital PBX & Centrex trunks in the analog category.

2/ The Ameritech operating companies did not report digital PBX & Centrex trunks or digital Centrex extensions.

3/ ALLTEL Carolina, Inc., ALLTEL Georgia Communications Corp., ALLTEL Pennsylvania Inc., and the Western Reserve Telephone Co. reported in-service local loop circuit kilometers. ALLTEL Carolina, Inc. and ALLTEL Georgia Communications Corp. did not report digital PBX & Centrex trunks and digital Centrex extensions by technology. ALLTEL Pennsylvania Inc. and the Western Reserve Telephone Co. provided digital PBX & Centrex trunks and not digital Centrex extensions by technology.

STATISTICS OF COMMUNICATIONS COMMON CARRIERS

Note -- Detail may not match totals because of necessary rounding.

1/ See Tables 2.10 and 2.11 for data of individual carriers. The FCC's Accounting Review Order, 14 FCC Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning with the 1999 reporting year. A mid-sized ILEC is a carrier whose annual operating revenues, either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than $7 billion. Interexchange carriers are not required to file comprehensive reports with the Commission; however, limited information for such carriers with operating revenues at or above the 1999 reporting threshold of $114 million are included in Tables 1.2 through 1.6, and 2.1. Blank spaces denote the ILEC accounts that have been deleted to reflect the new streamlined reporting requirements.

2/ Discrepancies between last year's ending balance and this year's beginning balances are due to additions, deletions, and mergers of reporting carriers.

Notes for Table 2.9

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

Note – The FCC's Accounting Review Order, 14 FCC Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning with the 1999 reporting year. A mid-sized carrier is a carrier whose annual operating revenues, either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than $7 billion. Interexchange carriers are not required to file comprehensive reports with the Commission. However, limited information for such carriers with operating revenues at or above the 1999 reporting threshold of $114 million are included in Tables 1.2 through 1.6 and 2.1.

– Detail may not match totals because of necessary roundings.

– In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 43-02).

NA - Not applicable.

Notes for Table 2.10

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

Note – The FCC's Accounting Review Order, 14 FCC Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized ILEC is a carrier whose annual operating revenues, either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than $7 billion. Interexchange carriers are not required to file comprehensive reports with the Commission; however, limited information for such carriers with operating revenues at or above the 1999 reporting threshold $114 million are included in Tables 1.2 through 1.6 and 2.1.

– Detail may not match totals because of necessary roundings.

– In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 4302).

Code letters are shown above the name of each company owned or controlled by a holding company as of December 31, 1999.

Name of company	Code
Bell Atlantic Companies	BA
BellSouth Corporation	BS
SBC Communications Inc.	SBC
U S WEST, Inc.	W

Notes for Table 2.11

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

Note – The FCC's Accounting Review Order, 14 FCC Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized carrier is a carrier whose annual operating revenues either individually or when aggregated with those of any ILEC that it controls, is controlled by, or with which it is under common control, are less than $7 billion. Interexchange carriers are not required to file comprehensive reports with the Commission; however limited information for such carriers with operating revenues at or above the 1999 threshold of $114 million are included in Tables 1.2 through 1.6 and 2.1.

– Detail may not match totals because of necessary roundings.

– In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 43-02).

NA - Not applicable.

Code letters are shown above the name of each company owned or controlled by a holding company as of December 31, 1999.

Name of company	Code
ALLTEL Corporation	AL
Global Crossing Ltd.	GC
Sprint Corporation	S
All others that are part of a holding company group	O

1/ Central Telephone Company of Texas, Inc. has no employees of its own. It receives labor and benefit expense allocations from the affiliated company, United Telephone Company of Texas, Inc.

See notes following this table.

Notes for Tables 2.12 through 2.19

Data for these tables were obtained from the ARMIS (Automated Reporting Management Information System) reports (FCC Report 43-01) filed by local exchange companies with operating revenues for the year 1998 equal to or in excess of $112 million. The FCC's Accounting Review Order, 14 Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized carriers is a carrier whose annual operating revenues either individually or when aggregated with those of any ILEC it controls, is controlled by, or with which it is under common control, are less than $7 billion. Interexchange carriers are not required to file comprehensive reports with the Commission; however limited information for such carriers with operating revenues at or above the 1999 threshold of $114 million are included in Tables 1.2 through 1.6 and 2.1.

The reports are filed on a study-area basis and include financial and operational data on revenues, expenses, investment, access lines and minutes of use.

Information presented in these tables was received from 11 companies for 128 study areas representing all the states (except Alaska), the District of Columbia and the Commonwealth of Puerto Rico. One small GTE study area covers portions of several states; data from this study area are labeled unclassified. Data for all tables are derived from the 1999 calendar-year submissions from the companies.

Detail may not match totals because of necessary roundings.

Detail and totals shown may not match detail or totals shown elsewhere in this publication or from sources which have similar data element names. Some of the reasons are:

1. The Commission's instructions to the companies as to which data sub-elements should be included when reporting a particular data element may vary among the different ARMIS reports.

2. Some companies may interpret the Commission's instructions differently.

3. Some companies may use different internal data bases to compile data for different ARMIS reports; e.g., U S WEST includes data for Malheur Telephone Company in its 43-01 data submission for the company's Oregon study area; however, the company does not include data from Malheur in its 43-02 (ARMIS USOA report) data submission, which is aggregated at the total company level.

4. Some companies discover discrepancies and refile data for one ARMIS report but not another.

5. Tables 2.12 - 2.19 do not include Commonwealth Telephone Company since that carrier does not provide data for all columns requested in the ARMIS 43-01.

Both Commission and company personnel are working to detect and correct discrepancies in the data and to clarify the reporting requirements.

The 11 companies that filed ARMIS 43-01data from which these tables were derived are:

Large LECs

1. Bell Atlantic Corporation
2. BellSouth Corporation
3. SBC Communications, Inc.
4. U S WEST, Inc.
5. GTE Corporation

Mid-Sized LECs

6. Aliant Communications Co.
7. ALLTEL Corporation
8. Cincinnati Bell Telephone Co.
9. Citizens Utilities Company and subsidiaries
10. Frontier Telephone of Rochester, Inc.
11. Sprint Corporation

Notes for Tables 2.12 through 2.18

The total column reflects the operating results for each of the rows itemized in these tables, and it includes all regulated and nonregulated company operations for each row. These amounts are presented prior to separation between state and interstate jurisdictions.

Subtracting all non-regulated and adjustments from the total column gives the subject-to-separations column, which reflects that portion of each row that must be allocated between state and interstate jurisdictions pursuant to Part 36 of the Commission's rules.

The state and interstate columns reflect the allocation of the amount in the subject-to-separations column into its state and interstate components pursuant to those rules. In some instances, the interstate column also reflects Commission-prescribed adjustments made after the separations process. These adjustments are made only at the interstate level; consequently, the state and interstate columns may not necessarily add up to the subject-to-separations column.

All the remaining columns concern the further sub-division of the interstate column amount into various elements pursuant to Part 69 of the Commission's rules.

The common line access element columns reflect costs that are recovered through subscriber line charges and a carrier common line charge assessed upon all interexchange carriers that use local exchange common line facilities for the provision of interstate or foreign telecommunications services. These costs are allocated to the pay telephone or inside wire columns where applicable, with any residual allocated to the base factor portion column. For some rows where no allocation is specified, the entire common line cost is shown in the total column.

The traffic-sensitive access element columns reflect costs associated with traffic-sensitive plant engineered to handle the anticipated volume of calls. The switching column reflects that portion of each row associated with the connection of toll lines to toll lines, or toll lines to local central offices, exclusive of equal access costs if the exchange carrier has a separate equal access rate element. The equal access column includes only initial incremental expenditures for hardware and other equipment, and initial incremental presubscription costs related to the provision of equal access which would not be required absent the provision of equal access. This column applies to only those carriers having a separate equal access rate element. The transport column reflects that portion of each line item applicable to charges assessed upon all interexchange carriers who use switching or transport facilities that are apportioned to the transport element or elements for purposes of apportioning net investment. The information column reflects that portion of each row applicable to charges assessed upon all interexchange carriers that are connected to assistance boards through interexchange directory assistance trunks.

The special access column reflects that portion of each row applicable to the total of all sub-elements that have been established for the use of equipment or facilities assigned to the special access element for purposes of apportioning net investment.

The total access column reflects the sum of the common line total column, the traffic-sensitive total column, and the special access column.

The billing and collection column reflects that portion of each row applicable to billing and collection services.

The interexchange column reflects that portion of each row applicable to interexchange services.

The mid-sized LECs do not file rows 1340, 1350 and 1360 in Table 2.12.

The mid-sized LECs do not file rows 1410, 1420, 1490 and 1590 for taxes, but file row 1595, federal, state and other. This is reflected in Tables 2.12 and 2.15.

Notes for Table 2.19

Billable Access Lines

Figures for billable access lines reported in the ARMIS 43-01 report for some companies are slightly different from figures for switched access lines reported in the ARMIS 43-08 report for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that WATS, WATS-like, and derived ISDN channels are not treated as billable access lines in the ARMIS 43-01, but are included in the count of access lines in the ARMIS 43-08. Some companies may have included company official lines in their ARMIS 43-08 report.

Definitions of the billable access columns in the table follow:

1. Residence lifeline - customer premises terminations (CPTs) for which the residence interstate subscriber line charge is reduced or waived. A CPT is a line termination at the customer premise, rather than at the central office. CPTs are commonly referred to as billable units.

2. Residence non-lifeline - CPTs subject to the residence interstate subscriber line charge excluding lifeline CPTs.

3. Business single line - CPTs subject to the single-line business interstate subscriber line charge, excluding company official, mobile radiotelephone and public telephones.

4. Business multiline - CPTs subject to the multiline business interstate subscriber line charge, including multiline semi-public lines, PBX trunks, Centrex CU trunks, hotel/motel LD trunks and Centrex CO lines.

5. Special access - lines subject to a $25 surcharge. the surcharge applies to lines connecting two customer premise locations, one of which is a PBX that may connect to the public switched network.

6. Total billable access lines - the sum of the aforementioned five columns of data.

Traffic-Sensitive Minutes of Use

Total premium traffic-sensitive MOU are calculated by dividing adjusted premium line termination revenues by the line termination rate, calculated pursuant to Section 69.205 of the FCC rules.

Total non-premium traffic-sensitive MOU are calculated by dividing the adjusted non-premium traffic-sensitive line termination revenues by the product of the line termination rate and 0.45, calculated pursuant to Section 69.113 of the FCC rules.

Notes on International Traffic Data:

Data shown were combined from reports submitted to the FCC by international carriers pursuant to Section 43.61 of the Commission's rules and regulations. Detail may not add to totals due to rounding.

The domestic United States consists of Alaska, Hawaii, the conterminous United States, and Puerto Rico. The total for U.S. points shown in the table represents the total traffic between the domestic United States and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands).

Figures between -500 and 0 are denoted (*). Figures between 0 and 500 are denoted *.

Data for individual United States points (including small points such as American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands) and data for individual carriers, are included in the "Section 43.61 International Telecommunications Data" report, published annually by the Industry Analysis Division of the FCC's Common Carrier Bureau.

Carriers have requested confidential treatment for transiting minutes by country.

Notes on International Private Line Service Data:

Data shown were combined from reports submitted to the Commission by international carriers pursuant to Section 43.61 of the Commission's rules and regulations.

The domestic United States consists of Alaska, Hawaii, the conterminous United States, and Puerto Rico. The total for U.S. points shown in the table represents the total traffic between the domestic United States and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands).

Data for individual United States points (including smaller points such as American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands) and data for individual carriers, are included in the "Section 43.61 International Telecommunications Data" Report, published annually by the Industry Analysis Division of the FCC's Common Carrier Bureau.

Carriers report the number of leased circuits as of year end and the number of 64 kilobits per second (64 Kbps) equivalent bearer circuits.

Detail may not add to totals due to rounding.

Notes on International Miscellaneous Service Data:

Data shown were combined from reports submitted to the Commission by international carriers pursuant to Section 43.61 of the Commission's rules and regulations.

The domestic United States consists of Alaska, Hawaii, the conterminous United States, and Puerto Rico. The total for U.S. points shown in the table represents the total traffic between the domestic United States and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands).

Data for individual carriers and some additional traffic measures are included in the "Section 43.61 International Telecommunications Data" report, published annually by the Industry Analysis Division of the FCC's Common Carrier Bureau.

Detail may not add to totals due to rounding.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.

ISR/Hubbed - International Simple Resale (ISR) refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the U.S. and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 CFR 63.17.

Alternative - Also referred to as "flexible" settlement arrangements. Carriers must report separately in their Section 43.61 traffic reports their U.S. and foreign billed traffic that was settled under an alternative settlement arrangement for which the carrier received Commission approval under Section 64.1002 of the rules. See 47 CFR 64.1002.

Notes for Table 3.6

The following companies' Section 43.61(a) international telecommunications traffic reports were combined in calendar year 1998 because of mergers, acquisitions, and changes in corporate structure:

1. ACC Corporation was bought by Teleport. AT&T subsequently bought Teleport. AT&T's Section 43.61(a) data filing includes ACC Corporation.
2. Allnet Communication Services, Inc. d/b/a Frontier Communications Services' Section 43.61(a) data filing includes the following companies:

   Frontier Communications International Inc.
   Frontier Telemanagement Inc.
   Frontier Communications of the West, Inc.
   Frontier Communications - North Central Region, Inc.

3. Consolidated Communications Telecom Services Inc. merged with McLeodUSA Telecommunications Services, Inc.
4. GST USA, Inc. aggregated its Section 43.61(a) report for the following subsidiaries:

   GST Call America, Inc.
   GST Net, Inc.
   GST Telecom, Inc.
   TotalNet Communications, Inc.

5. GTE Pacifica is a subsidiary of Micronesian Telecommunications Corporation (MTC). MTC filed Section 43.61(a) data as GTE Pacifica.
6. LCI bought U.S. Long Distance. LCI merged with Qwest Communications Corporation.
7. Maritime Telecommunications Network, Inc. is a wholly owned subsidiary of ICG Satellite Services, Inc., which is a subsidiary of ICG Communications, Inc. ICG Satellite Services, Inc., does not provide international services in its own right; therefore, it has no traffic and revenue to report.
8. NEXTLINK Communications, Inc. consolidated its annual Section 43.61(a) international traffic report for the following subsidiaries:

   ITC d/b/a NEXTLINK Affinity
   NEXTLINK California
   NEXTLINK Delaware, Inc.
   NEXTLINK Georgia, Inc.
   NEXTLINK Illinois, Inc.
   NEXTLINK New Jersey, Inc.
   NEXTLINK New York, Inc.
   NEXTLINK Ohio, Inc.
   NEXTLINK Pennsylvania, Inc.
   NEXTLINK Pennsylvania Merger Co. II, Inc.
   NEXTLINK Tennessee, Inc.
   NEXTLINK Utah, Inc.
   NEXTLINK Washington, Inc.
   Telecommunications of Nevada, L.L.C. d/b/a NEXTLINK Nevada

9. Price Communications Wireless, Inc.'s Section 43.61(a) report is consolidated for the following subsidiaries:

   Price Communications Wireless II, Inc.
   Price Communications Wireless IV, Inc.
   Price Communications Wireless VI, Inc.
   Price Communications Wireless VIII, Inc.
   Price Communications Wireless III, Inc.
   Price Communications Wireless V, Inc.
   Price Communications VII, Inc.
   Price Communications Wireless IX, Inc.

10. RSL COM U.S.A., Inc.'s Section 43.61(a) data filing includes all of its subsidiaries.
11. Star Telecommunications, Inc.'s Section 43.61(a) report includes T-One Communications Corporation, which was acquired by Star.
12. Vista International Communications, Inc. merged with ACC Corporation, which merged with AT&T.
13. WorldCom, Inc. and MCI Communications, Inc. merged on September 14, 1998. The new company is called MCI WorldCom, Inc.
14. WinStar Wireless, Inc. filed as a successor to WinStar Telecommunications, Inc. WinStar Telecommunications, Inc. merged into WinStar Wireless, Inc. on March 31, 1998.

The following companies changed names:

15. CEO Telecommunications, Inc. was formerly known as L.D. Services, Inc.
16. Citizens Long Distance, for calendar year 1998, filed as Teleview Communications, Inc. d/b/a Citizens Long Distance.
17. FaxSav Inc. changed its name to NetMoves Corp. in June 1999.
18. Local Long Distance, L.C., filed as Local Alliance Network for calendar year 1997.
19. Mid-Plains Communications Systems Inc. d/b/a Mid-Plains Long Distance filed its calendar year 1998 Section 43.61(a) data as Chorus Networks.
20. StormTel, Inc. was formerly known as Z-Tel, Inc.
21. Telecom New Zealand filed its calendar year Section 43.61(a) data as Telecom New Zealand USA Limited.
22. TXU Communications Telecom was formerly called LCT Long Distance.
23. Valu-Line Long Distance, starting in calendar year 1997, should have filed as Valu-Line of Longview, Inc.
24. Williams Communications, Inc., was formerly VYVX, Inc.

1/ Where more than one PTT connects with U.S. carriers, the table shows rates for the first carrier providing service. These include Korea Telecom in Korea, Kokusai Denshin Denwa in Japan, PLDT in the Philippines, CODETEL in the Dominican Republic, and British Telecom in the United Kingdom. Accounting rates may vary by time of day, or by volume of traffic.

2/ An accounting rate is part of a compensation agreement negotiated between two correspondents on a particular international route. It is intended to reimburse each carrier for the cost incurred to provide service. Accounting rate agreements state that the two carriers will share the accounting rate on a 50/50 basis. Many accounting rates are defined in monetary units other than U.S. dollars, such as special drawing rights (SDRs) and gold francs (GFs).

3/ The figures for service with Mexico represent average settlement per minute (ASPM). Accounting rates are not used for service between Mexico and the United States. In their place, carriers negotiate a set of settlement rates that vary by service classification and call destination. Each set of settlement rates is designed to achieve the ASPM figure for service to and from the country.

Notes to Tables 4.1 through 4.9

The historical data presented in these tables were compiled from previous editions of "Statistics of Communications Common Carriers" (SOCC), formerly known as "Statistics of the Communications Industry in the United States." For the most part, the original data were gathered from the annual reports of Class A telephone carriers and, beginning in 1957, include the voluntary submissions of selected large telephone companies not subject to the Commission's reporting requirements. The 1950 data include information submitted by Class B carriers, which are smaller companies that have less detailed accounting requirements than Class A carriers.

Over the years, the number of carriers reporting to the Commission has varied because of mergers, carrier reclassification, and changes in the reporting criteria. In 1985, the annual operating revenue requirement for telephone carrier reporting was changed from $1 million to $100 million. As a result, twenty-one companies that had filed a report for 1984 were relieved of this requirement the following year. These carriers accounted for about $440 million in total operating revenues in 1984, with two-thirds of them reporting less than $20 million.

In the 1995/96 edition of this publication, the 1995 data did not include AT&T Communications or Alascom which had been acquired by AT&T Corp.) because the detailed reporting requirements for these carriers were eliminated after the Commission had decided that AT&T would no longer be considered a dominant carrier. In the1996/97 book, these tables were revised to exclude data for the aforementioned carriers for 1984 and subsequent years--the period since AT&T's divestiture of the Bell operating companies. (The double line in the year column of each table marks the time of divestiture, which was effective Jan. 1, 1984.) Therefore, the data for 1984 to the present are not comparable to the data for 1950-83. Historical data that include AT&T Communications and Alascom appear in the 1994/95 and earlier editions of this publication.

On Jan. 1, 1988, a revised Uniform System of Accounts (USOA) went into effect. As a result of these revisions, data submitted under the new rules may not be comparable on a one-to-one basis with data filed for previous years. In these tables, USOA account numbers are given for each column heading (where applicable). The three-digit numbers refer to Part 31 of the Commission's rules, whereas those with four digits refer to Part 32, the revised USOA that superseded Part 31.

Beginning with the reports filed for 1999, new and revised accounting rules that were adopted by the Commission on May 18, 1999 (14 FCC Rcd 11396) streamlined the reporting requirements for certain mid-sized incumbent local exchange carriers. As a result of these changes, only the Bell operating companies and the reporting GTE companies continue to report certain categories of revenues and plant that are included in these historical tables. Such items are indicated by the italicized figures in tables 4.1, 4.3, 4.4, and 4.9.

Revenues

In Table 4.3, the toll private line revenue categories used for the 1950-87 period were introduced in the 1981 annual reports, and are not completely comparable to the categories listed in the reports for 1980 and prior years. The revenue breakdown before 1981 was as follows: telephone, teletypewriter, other telegraph, Telpak (beginning in 1961), program transmission - audio, program transmission - video, and other private line services.

1/ Effective Nov. 15, 1999, account 5010, public telephone revenues, was eliminated.

2/ Access revenues were first reported in 1984 following the AT&T divestiture.

3/ In the 1957 through 1973 SOCC books, details of private line revenues were not totaled for carriers that had filed reports on a voluntary basis. In this tabulation, aggregate data for those carriers are included in the other services category of toll private line service revenues.

4/ In 1982 through 1987, some of the non-Bell companies did not provide a breakdown of their toll private line revenues. These revenues were reported as either voice-grade service revenues or other private line service revenues.

5/ Wide area toll service (WATS) began in 1961. During the 1961-75 period, some of the non-Bell companies included WATS revenues in their message toll service revenues. The WATS figures for 1961-65 include revenues for wide area data service, which was offered on a limited developmental basis during that period.

6/ For 1961 through 1980, includes Telpak.

7/ Beginning in 1961, includes earth station revenues.

Expenses

1/ The plant specific operations expense accounts are used to record the expenses associated with particular kinds of telecommunications plant. For details, see Table 2.8.

Notes to Tables 4.1 through 4.9 -- Continued

Earnings

1/ Net operating income for 1950-87 is after the addition and subtraction of rents from and for the lease of operating property from net operating revenues. Beginning in 1988, these rents are included in operating revenues and expenses.

2/ Beginning in 1970, net income is after extraordinary and delayed items. In earlier years, these items were charged or credited to retained earnings.

3/ The significant change in nonoperating income and expense and nonoperating taxes that occurred in 1993 is primarily attributable to business restructuring and the adoption of new accounting standards.

Assets and Liabilities

1/ Includes prepaid accounts.

2/ Includes miscellaneous physical property (account 103), which is reported as nonoperating plant (account 2006) under the revised USOA.

3/ Includes other jurisdictional assets (account 1500), which were not reported before 1988.

4/ In 1983, AT&T changed the par value of its common stock from $16.67 to $1 per share.

Plant

1/ During the 1957-84 period, detailed plant account data for those carriers that reported to the Commission on a voluntary basis were not included in the SOCC tabulations. Accordingly, the number of carriers included in this table for that period differs from the number included in Tables 4.1 through 4.8.

2/ In 1999, accounts 2114, 2115, and 2116 (special purpose vehicles, garage work equipment, and other work equipment, respectively) were combined into a single new account 2114, tools and other work equipment.

3/ Includes operator systems (account 2220).

4/ Includes satellite and earth station facilities (account 2231.1).

5/ This column includes drop and block wires (account 233) for the 1950-56 period. Following the elimination of this account in 1957, drop and block wires were included in account 242.1 or 242.3, as appropriate.

6/ Account 235 was called "booths and special fittings" during the 1950-57 period. Beginning in 1957 and continuing through 1983, public telephone equipment was included in account 231, station apparatus.

7/ Account 262 includes PBX and station equipment installed for official company use. Under the new rules, such plant is included in account 2123, office equipment.

8/ Intrabuilding network cable was called "house cable" under the old rules and was included in the aerial cable account (242.1).

9/ Includes account 207, right-of-way, which was eliminated as a separate account effective Jan.1, 1960. From 1960 through 1987, right-of-way was included primarily in the appropriate outside plant account.

10/ Includes unclassified plant (reported in 1969, 1974, 1975, and 1984).

11/ Consists of organization, franchises, and patent rights.

12/ Consists of capital leases (account 2681) and leasehold improvements (account 2682).

13/ Includes telephone plant adjustment (account 100.7), an account that was not used by any of the reporting carriers after 1955. In the 1951 through 1955 reports, this adjustment was made to net plant rather than to telephone plant in service.

14/ Under the revised USOA, satellite earth stations are included in central office transmission facilities.

15/ Beginning in 1995, the distinction between short-term and long-term plant under construction was eliminated. Account 2003 now comprises total plant under construction; account 2004 was deleted.

16/ Includes goodwill (account 2007).

STATISTICS OF COMMUNICATIONS COMMON CARRIERS

NA - Not available.

Source: These historical statistics were compiled from previous editions of "Statistics of Communications Common Carriers." Totals may be understated because certain data pertaining to the carriers included in this table are not available.

Note: Between 1987 and 1988, there were significant changes in the definitions of many of the items in this table. With the implementation of a new Uniform System of Accounts (USOA) in 1988, as indicated in the notes to Tables 4.1-4.9, new categones of reporting units of physical plant and network usage were created and defined. Some of these definitions were further refined when the reporting mechanism of the of the carriers was changed in 1992 for the filing of 1991 data. For these reasons, there may be inconsistencies in the data reported for 1984-1987 compared to what was reported for 1988. There may also be inconsistencies between 1988 and subsequent years, when carriers were adapting to the new USOA and the automated reporting requirements.

1/ For the years 1988-1990, miles were converted to kilometers by multiplying the number of miles by 1.6093 and rounding to the nearest whole number.

2/ Before 1997, referred to as sheath km of copper cable.

3/ The 1997 figures were revised downward (by about 2.7 billion total interLATA calls) after Pacific Bell had submitted new data for that year. The revision was apparently based on a change in the method of counting calls.

Notes to Table 4.11

NA - Not available.

Note -- This table incorporates a comprehensive revision in the national income and product accounts, which resulted in revised estimates back to 1959.

1/ Data beginning in 1978 are for all urban consumers; earlier figures are for urban wage earners and and clerical workers. Beginning in 1983, the index incorporates a rental equivalence measure for homeowners' costs.

2/ Without inventory valuation and capital consumption adjustments.

3/ Expenditures by industries surveyed quarterly. Covers all domestic nonfarm business except real estate; professional services; membership organizations and social services; and forestry, fisheries, and agricultural services. Series was discontinued in 1995.

4/ Bank-discount basis; prior to 1979, data are for 4- to 6-month paper. The Federal Reserve no longer publishes the series.

5/ Estimates as of July 1. Includes Alaska and Hawaii and armed forces abroad.

6/ For civilian noninstitutional population, 16 years of age and older. Annual averages of monthly data.

7/ Estimates as of March, except 1951-1955, as of April. Prior to 1960, excludes Alaska and Hawaii.

8/ New private and public housing units started from 1959 through 1987. Beginning in 1988, figures exclude public housing starts, which in 1987 were 2.2 thousand units.

Introduction to Historical Rate Table 4.12

Table 4.12 presents a summary of trends in basic interstate message toll rates for the three largest interstate long distance carriers: AT&T Communications, MCI-WorldCom, and Sprint Communications Company. The information is based on each carrier's TARIFF F.C.C NO. 1, as well as AT&T's TARIFF F.C.C. NO. 27*, and on the rates that were in effect on December 31 of each year. Alternative rates and discount calling plans are available from each of these carriers giving customers better value for their long distance expenditures. The rates shown may differ slightly from the amounts charged due to rounding.

The toll rates are charges for toll telephone calls between the top 10 Metropolitan Statistical Areas (MSAs) as determined by the 1990 Census:

1) New York, NY-NJ-CT
2) Los Angeles, CA
3) Chicago, IL-IN-WI
4) San Francisco, CA
5) Philadelphia, PA-NJ-DE-MD
6) Detroit, MI
7) Boston, MA-NH
8) Washington, DC-MD-VA
9) Dallas, TX
10) Houston, TX

The toll rates are based on approximate rate distances between pairs of cities. Rate distances are airline mileages determined by the "V-H System." Rate centers are designated by vertical (V) and horizontal (H) coordinates, and distances (mileages) are mathematically computed using the coordinate differences between rate centers. Rate mileages are used to determine the per-minute rate charged. Beginning in 1984, all three carriers restructured their tariff rate schedules so as to charge lower rates for each additional minute. Between 1989 and 1992, each of the three carriers eliminated the differences between its initial-minute and additional-minute rates. Beginning in 1993, all three carriers began to restructure their basic business rates so as to apply to Peak (Day) and Off-Peak (Evening and Night/Weekend) periods only. Moreover, in addition to rate-period unification, these carriers began to move toward mileage-band consolidation and basic rate simplification shown by trends in the rate table.

Table 5.4 - Long-Term Trends in Price Indexes

(Annual Rate of Change)

Price Index	1936 to 1999	1988 to 1999
CPI - All Goods and Services	4.0 %	3.2 %
CPI - All Services	4.4	3.7
CPI - Telephone Services ***	2.0	0.9
CPI - Major Categories:		
- Food & Beverages	*	3.1
- Housing	*	3.0
- Apparel & Upkeep	2.9	1.4
- Transportation	3.7	2.8
- Medical Care	5.1	5.5
- Recreation**	**	1.9
- Other Goods & Services	*	5.9
CPI - Public Transportation	4.9	4.3
CPI - Piped Gas	3.5	2.0
CPI - Electricity	2.1	1.2
CPI - Sewer & Water Maintenance	*	4.7
CPI - Postage	4.1	3.5

Note – The Bureau of Labor Statistics collects a variety of information on telephone service as part of three separate programs: the consumer price index (CPI), the producer price index (PPI), and the consumer expenditure survey.

* Series not established until after 1935.

** Series not established until 1992. Figure reflects annual change between 1992 and 1998.

*** The CPI telephone service index was revised in December of 1997.

Table 5.5 - Annual Rate of Change in Major Price Indexes

Year	GDP Chain-Type Price Index	Consumer Price Index (CPI)					Producer Price Index (PPI)***		
		All Items	All Telephone Services	Local Services	Interstate Toll Service	Intrastate Toll Service	Local Residential Services	Local Business Services	Public Switched Toll Service

1999**	1.6	2.7	0.4	2.8	-0.7	-1.6	0.2	0.1	-5.4

Note – The Gross Domestic Product (GDP) fixed-weight chain index reflects inflation throughout the economy, and the CPI for all items measures the impact of inflation on consumers. The CPI index of all telephone services is based on a "market basket" intended to represent the telephone related expenditures of a typical urban household. It includes both local and long distance services. The CPI index of local telephone charges is based on monthly service charges, message unit charges, leased equipment, installation, enhanced services (such as tone dialing and call waiting), taxes, subscriber line charges, and all other consumer expenditures associated with telephone services except long distance charges. In contrast, the PPI index of local residential services is based only on service charges for residential service, optional touch-tone service, and subscriber line charges. The PPI telephone indexes were revised in July 1995. Index values after July 1995 are not comparable to index values published from 1972 through July 1995.

NA - Not available.

* The CPI telephone service index was revised in December of 1997.
** Advance estimate.
*** Due to month-to-month variation in the new PPI index, PPI price levels are determined using a five-month weighted average.

Table 5.6 - Average Residential Rates for Local Service in Urban Areas (As of October 15)

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999
Representative Monthly Charge *	$12.36	$13.03	$13.05	$13.16	$13.19	$13.62	$13.71	$13.67	$13.75	$13.75
Subscriber Line Charges	3.55	3.56	3.55	3.55	3.55	3.54	3.54	3.53	3.52	3.58
Additional Monthly Charge for Touch-Tone Service	1.33	1.06	0.97	0.94	0.77	0.44	0.30	0.25	0.10	0.09
Taxes, 911 and Other Charges	2.00	2.12	2.15	2.29	2.31	2.41	2.40	2.42	2.39	2.45
Total Monthly Charge	19.24	19.77	19.72	19.95	19.81	20.01	19.95	19.88	19.76	19.87
Basic Connection Charge	$43.06	$42.00	$41.50	$41.38	$41.28	$40.91	$41.11	$41.04	$41.24	$41.26
Additional Monthly Charge for Touch-Tone Service	1.77	1.27	1.22	1.23	0.85	0.23	0.23	0.17	0.12	0.12
Taxes, 911 and Other Charges	2.32	2.30	2.29	2.30	2.33	2.44	2.36	2.46	2.38	2.52
Total Connection Charge	43.06	45.57	41.50	44.92	44.46	43.58	43.70	43.67	43.74	43.90
Additional Charge if Drop Line and Connection Block Needed	6.89	6.89	6.50	7.29	6.74	5.90	5.74	5.65	5.64	5.76
Lowest-Cost Inside Wiring Maintenance Plan	$1.07	$1.20	$1.25	$1.31	$1.45	$1.52	$1.78	$1.68	$2.22	$2.65

Note – Average monthly local rates are based on surveys by FCC staff using the same sampling areas and weights used by the Bureau of Labor Statistics in constructing the consumer price index.

* Rate is based on flat-rate service where available, and on measured/message service with 100 five-minute, same-zone, business-day calls elsewhere.

Table 5.7--Average Local Rates for Businesses with a Single Line in Urban Areas (As of October 15)

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999
Monthly Representative Service Charge*	$30.97	$32.29	$32.45	$32.70	$32.25	$32.48	$32.58	$32.76	$32.44	$32.22
Subscriber Line Charges	3.57	3.57	3.56	3.57	3.57	3.57	3.54	3.54	3.54	3.52
Additional Monthly Charge for Touch-Tone Service	2.35	1.84	1.71	1.67	1.21	0.97	0.82	0.38	0.32	0.25
Taxes, 911 and Other Charges	4.32	4.42	4.57	4.63	4.61	4.79	4.87	4.99	4.97	5.01

Source: Data for 1992 - 1996 summarized from FCC Form 431 TRS Worksheets.
Data for 1992 - 1996 based primarily on FCC Form 457 Universal Service Worksheets with data from 1997 TRS Worksheets used for service providers not required to file a Universal Service Worksheet.
Data for 1999 summarized from Form 499 Telecommunications Reporting Worksheets, which replaced both the Form 431 and Form 457.

Note: Some data for prior years have been revised. Detail may not add to totals due to rounding.

* TRS filers generally reported pay telephone revenue as local service revenue, access revenue or operator toll revenue. The Universal Service Worksheet contains a separate category for pay telephone revenue.

** TRS Worksheet filers generally reported special access revenue as access revenue. Using Universal Service Worksheet data as the primary source instead of TRS worksheet data explains the jump in local private line revenue and the fall in access revenue shown for 1997. TRS Worksheet filers included subscriber line charges with other access charges. Universal Service Worksheet filers report subscriber line charges in a separate category. The increase from 1997 to 1998 represents PICC charges levied by ILECs as well as $1.2 billion of PICC pass-through charges levied by toll carriers.

*** Significant amounts of enhanced service, billing and collection, CPE and other non-telecommunications revenues were reported in the TRS mobile and other local service categories through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenue reported as mobile and other local revenue were estimated as 70% of the amounts that Tier 1 LECs reported in their ARMIS filings as miscellaneous and non-regulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenue.

**** Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenue. Reported amounts are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate and interstate revenue by type of carrier.

Source: Data for 1992 - 1996 summarized from FCC Form 431 TRS Worksheets.
Data for 1992 - 1996 based primarily on FCC Form 457 Universal Service Worksheets with data from 1997 TRS Worksheets used for service providers not required to file a Universal Service Worksheet.
Data for 1999 summarized from Form 499 Telecommunications Reporting Worksheets, which replaced both the Form 431 and Form 457.

* Filers are asked to select a service provider category that best describes their operations. The choices have changed over the years. For example, most satellite service providers identified themselves as other toll carriers in their 1997 TRS worksheets because there was no separate category for satellite service providers.

** Significant amounts of enhanced service, billing and collection, customer premises equipment (CPE) and other non-telecommunications revenues were reported on TRS worksheets by incumbent local exchange carriers (ILECs) and wireless carriers through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenue reported as mobile and other local revenue were estimated as 70% of the amounts that Tier 1 ILECs reported in their ARMIS filings as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenue.

*** Other adjustments include some amounts withheld to preserve confidentiality and revisions made after the initial publication of the data.
